PROJECTS

E-commerce websites

- Developed a fully responsive eCommerce website using React.js and Redux for state management.
- Features: Product browsing with search and filters, cart and checkout functionality, order tracking, user profiles, ratings/reviews, and integrated email notifications.

Movie App

- Successfully developed a dynamic movie browsing web application using React.js and The Movie Database (TMDb) API. Designed an engaging and responsive UI for an enhanced user experience across devices.
- Features: Explore trending, top-rated, and upcoming movies with detailed info; includes genre filtering and favorites using local storage.

Hospital Management System

- Designed and developed a web-based Hospital Management System using React.js for the frontend and efficient UI rendering.
- Features: Role-based access for admins, doctors, and patients; appointment scheduling, patient records, billing management, and real-time notifications. Implemented form validations, secure authentication, and seamless navigation for enhanced user experience.
